

Bargavi Thyagarajan
Science Officer

Bargavi Thyagarajan is a Science Officer at the Global HIV Vaccine Enterprise. In her current role, she plans and executes many of Enterprise's scientific programs geared towards accelerating the development of an effective HIV vaccine. She coordinates program development for the biennial HIV Research for Prevention Conference ([HIVR4P](#)) and oversees the eAccess Meeting initiative of the Enterprise. Prior to joining the Enterprise, she trained as a postdoctoral fellow in the laboratory of Dr. Jesse Bloom at the Fred Hutchinson Cancer Research Center, Seattle, USA. As a postdoctoral researcher, she used molecular and computational approaches to study immune-escape of influenza viruses after vaccination or a previous flu infection.

Dr. Thyagarajan holds a Master's degree in Biochemistry from the University of Madras, India and a Ph.D. in Oncological Sciences from the University of Utah, USA.
